For those who have been infected with COVID-19, we recommend receiving the vaccine after consulting your primary care physician and waiting 90 days after recovery.

Your consent is required to receive the vaccine

While we recommend that all Asahikawa residents receive the COVID-19 vaccine, it is not mandatory to do so. We will only administer the vaccine to those who have been provided with proper information about both the benefits and risk of side effects of immunization and who have consented of their own free will to be vaccinated. However, we require as a rule that a parent, guardian or caretaker provide their signature on the pre-vaccination questionnaire and accompany the child. We will not administer the vaccine without the parent/guardian's consent. The child will be unable to receive the vaccine if there is no signature on the form.

We ask that you not force those around you or at school to receive the vaccine, and that you not discriminate against those who have not received the vaccine.

About Underlying Conditions

Please consult your primary care physician first if you have any underlying medical conditions. For more on underlying conditions, please refer to the Asahikawa City Homepage.

Relief System for Injury to Health with Vaccination

There have been cases of damage to health (such as falling ill or acquiring a disability) as a result of vaccination. While such cases are extremely rare, a relief system has been set up for those who sustain permanent health damages. For more about the steps necessary to apply, please consult the Asahikawa Public Health Center's Measures for Novel Coronavirus Infection Control Division.

Other items of importance
